VACUUM-FORMED PLASTIC BRAILLE PLATE CATALOG

(complete to date)

September 15, 1961

Attached is a list of titles for which plastic plates have been, or are being, produced through the vacuum-formed plastic plate process, from hand-transcribed paper copies which have been loaned to the Printing House for this purpose. Reproduced copies of all titles listed are available for purchase on quota accounts.

It will be noted that catalog prices are not given for all titles, but only for the ones for which all volumes have been completed. A schedule of per-volume prices is attached, also, to give the basis for catalog prices. It is impossible, of course, to give prices on books until all the volumes have been processed and we can know the number of pages of each volume for the entire title.

All titles on the attached list have been embossed in Braille grade 2, one-side of the page.

* * *

In addition to the attached list, the Printing House maintains a centralized catalog of hand-transcribed textbooks for the first twelve school grades. The Printing House also furnishes a reference service with a view to helping anyone locate a needed hand-transcribed textbook which may be available, either for direct inter-library loan or for possible loan to the Printing House for purposes of making plastic plates for reproduction. For information, simply address the Plastic Braille Plate Department at the Printing House.

VACUUM-FORMED PLASTIC BRAILLE PLATE CATALOG
(complete)

September 15, 1961

(Note: The listing in this catalog parallels the classifications in the textbook section of the regular APH Catalog of Braille Publications.)
